User Feedback
<p>Thanks a bunch. I've been looking for supplementary material for review to prepare students for the BC Calculus test in May. This will definitely help:)</p> <p>- Educator - High School, USA</p>
<p>I am so thankful to OCW for existing! It is best self learning site I have found yet for my interests in Physics. THANK YOU!! I have learned SO much. It was a life long dream to attend MIT and while my academic record would have gotten me there, money was the dream killer. This has allowed me to "live the dream" so to speak.</p> <p>- Self Learner, USA</p>
<p>I just wanted to write and tell you how much help your OCW has helped me. I am a student at Tennessee Tech University and was previously having trouble keeping up with all the information covered in my classes. In an effort to stay current on the material, I went searching for supplemental information in the courses I am enrolled in. After visiting various study help pay sites, I stumbled upon this OCW site. I have since learned more from your video lectures than all other study sites combined. The ability to rewind and pause lectures by today's leaders in academia has been an invaluable tool to help me fully understand the information in my courses at TTU. I have since been recommending MIT's OCW to everyone in my classes who need help. Unfortunately, being a broke college student, I have no money to donate at this time but felt the need to commend your institution on making such a valuable resource available to everyone for free. This truly shows that MIT's interest is in furthering the development of technology, rather than padding bank accounts, which is a welcome change in today's greed motivated economy. Thank you MIT.</p> <p>- Student - College/University, USA</p>
