

Deliverable (B)

Hand Sketch

Due: Tuesday, January 16, 2007, 1pm

Create a hand-drawn sketch of your favorite concept for your 16.810 team project. You can choose what form that sketch can take:

- 1 point, 2 point or 3 point perspective (2-point is recommended)
- isometric drawing
- orthographic projection

Please deliver a copy of your hand sketch on drafting paper that is at least 17" by 11" large, and also upload an electronic scanned version by January 20, 2007 to the MIT server. The purpose of your hand sketch is to serve as guidance as you develop your initial CAD model.
