

# SE Standards Question – What do you think?

\* Required

What is your full name? \*

What is your opinion of these ISO / NASA / INCOSE etc... Systems Engineering Handbooks and Standards? \*

- They are all outdated and surpassed by the digital revolution
- Useful codification of best practices
- Can be dangerous if followed too closely
- Essential reading for any serious Systems Engineer
- I would never use them as a daily reference book
- I am still not sure
- Other

Provide any comments about SE standards you wish ...
