

# The Panama Canal

Carl D. Martland  
Senior Research Associate  
Massachusetts Institute of  
Technology

Taking the pilot out past the Bridge of the Americas to take charge of a ship

Note the queue of ships waiting to enter the Canal

# Miraflores Lock

# Miraflores Lock

**Original Art Deco  
Controls Still  
Functioning**

Catch a line for the cables using  
the most reliable means— a  
rowboat!

Then push the ship  
to the wall

## Attaching locomotives to ship

Locomotives hold the ship straight – the ship provides the power

# Pedro Miguel Lock

In the Cut!

**Gold Hill – Site of  
the Worst Slides**

Widening the cut to allow large ships to pass safely

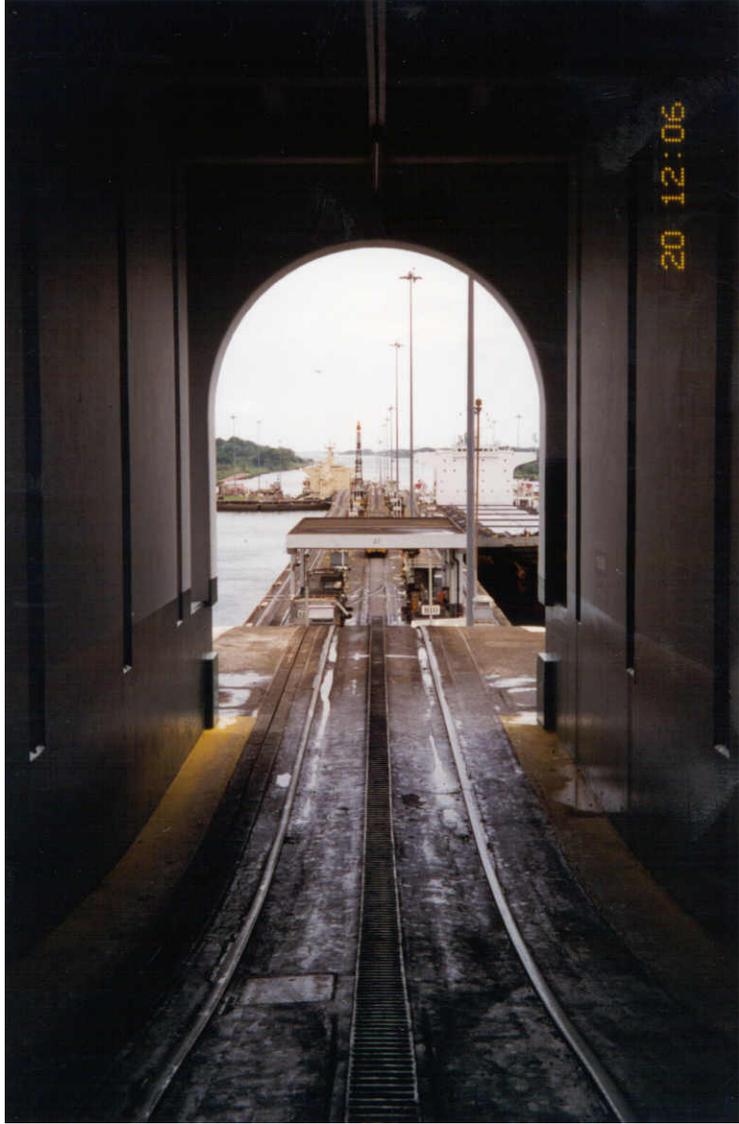

# **Leaving the Cut – Entering Lake Gatun**

“Still Stands the Forest Primeval”

## M.I.T. Terminal
