

Reading assignment Tom Jordan (05/05/1998)

In the last regular session of this course/seminar series Tom Jordan will present a lecture on seismological evidence for or against mantle stratification.

NB: The format is different than used so far; please study the following paper and prepare questions that pertain either to this paper specifically or to the issues discussed in earlier sessions.

There are NO student presentations.

- **Puster, P. and T.H. Jordan, How stratified is mantle convection? *J. Geophys. Res.*, 102, 7625-7646, 1997.**
