# Slides for Dose and Dosimetry

22.01 – Intro to Radiation

November 18<sup>th</sup>, 2015

# Dose Quality Factors

From Turner, J. E. *Atoms, Radiation, and Radiation Protection*.

**Table 12.1** Dependence of Quality Factor  $Q$  on LET of Radiation as Formerly Recommended by ICRP, NCRP, and ICRU

LET (keV $\mu\text{m}^{-1}$ in Water)	$Q$
3.5 or less	1
3.5–7.0	1–2
7.0–23	2–5
23–53	5–10
53–175	10–20
Gamma rays, X rays, electrons, positrons of any LET	1

**Table 12.2** Dependence of Quality Factor  $Q$  on LET as Currently Recommended by ICRP, NCRP, and ICRU

LET, $L$ (keV $\mu\text{m}^{-1}$ in Water)	$Q$
<10	1
10–100	$0.32L-2.2$
>100	$300/\sqrt{L}$

**Table 12.3** Principal Elements in Soft Tissue of Unit Density

Element	Atoms $\text{cm}^{-3}$
H	$5.98 \times 10^{22}$
O	$2.45 \times 10^{22}$
C	$9.03 \times 10^{21}$
N	$1.29 \times 10^{21}$

# Other Quality Factors

From Yip, Sidney. *Nuclear Radiation Interactions*..

**Table 9.1.** Values of the quality factor for different radiations. Source: ICRP [1991]; NCRP [1993].

Radiation	$QF$
$X, \gamma, \beta^\pm$ , (all energies)	1
Neutrons < 10 keV	5
10–100 keV	10
0.1–2 MeV	20
2– 20 MeV	10
> 20 MeV	5
Protons (> 2 MeV) [ICRP]	5
Protons (> 2 MeV) [NCRP]	2
Alpha particles	20

# The Ideal IMRT Dosimeter

---

- The dosimeter can determine absolute dose
- The dosimeter can provide three-dimensional data
- The dosimeter's response isn't orientation-dependent
- The dosimeter is well-calibrated, and the interpretation of its readout is rigorously supported by data
- The dosimeter's ability to measure absolute dose is insensitive to dose rate and energy of the radiation
- The dosimeter is non-toxic
- The dosimeter's cost to build and maintain is reasonable

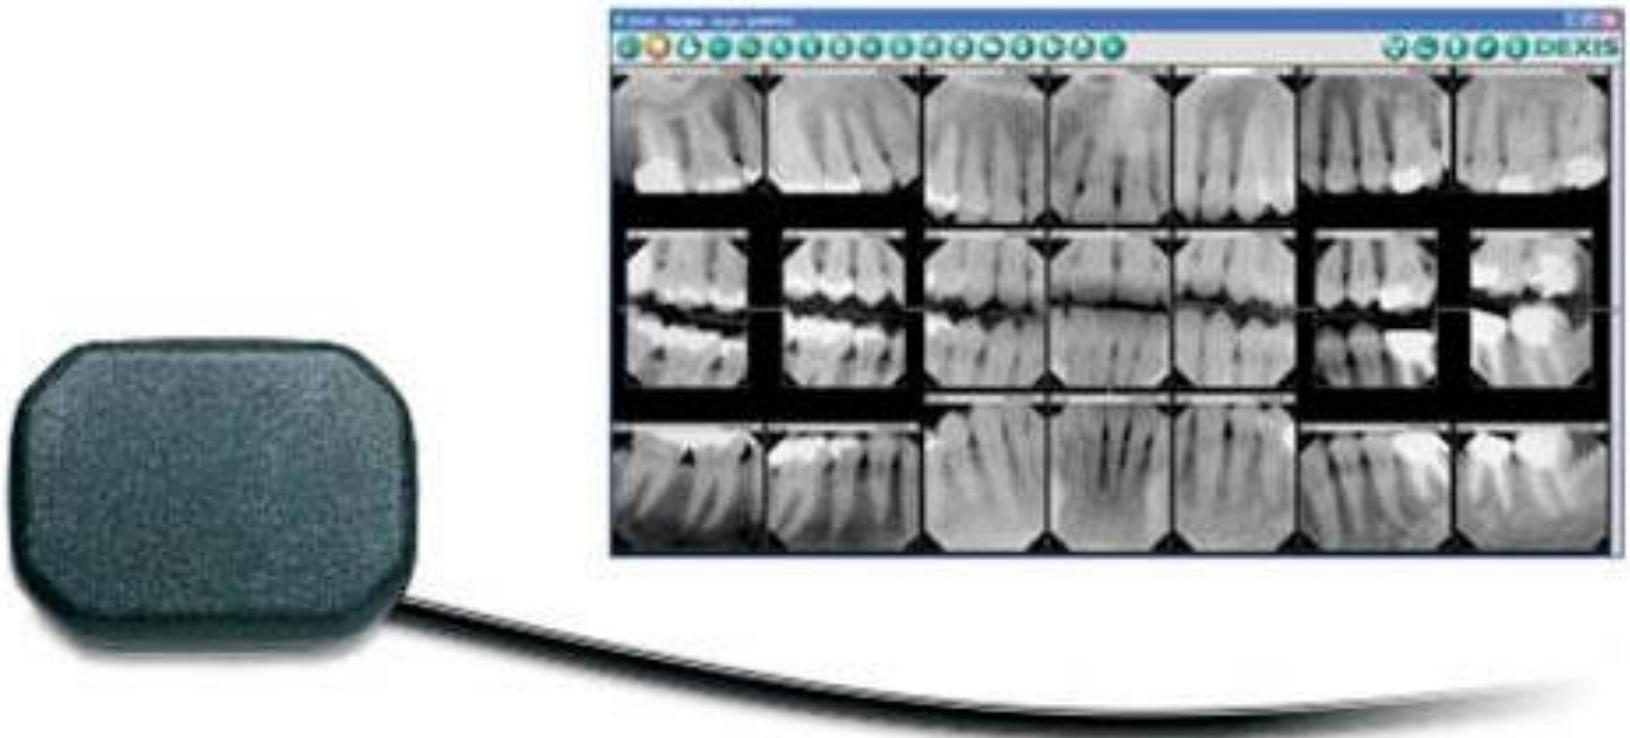

# Existing Dosimetry Methods

---

- Monte Carlo calculations
- Conventional port films
- Electronic portal imaging devices (EPID)
- Gel dosimetry
- Electron spin resonance spectroscopy
- Thermoluminescent dosimetry
- Silicon diodes
- Scintillation fibers
- Prompt gamma monitoring
- PET scans
- MOSFET dosimeters

# Electronic Portal Imagers (EPID)

# Problems

---

- Don't know the real dose to the tumor
- Don't know the dose to surrounding tissue
- Can't control the proton accelerator in real time
- Don't know the dose rate vs. time
- In-situ methods haven't worked well
- Ex-situ methods don't tell you real-time information

# Our Idea...

---

**... I will present it once our provisional patent is filed!!!**
